## MONTHLY STATISTICAL REPORT HIGHLIGHTS

March 1987

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the March figures cover the period from February 28, 1987 to March 28, 1987.

### Population

During March, the DOC population increased by seventy-seven offenders from 5961 to 6038 (excluding those in MCI-Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased 404 offenders from 5634 in March, 1986 to 6038 in March, 1987. This represents an increase of 7%.

### Admissions

During March there were 262 offenders committed to the DOC from courts including 126 to Cedar Junction, 62 to Concord and 75 to Framingham. To date there have been 746 court commitments to the DOC during 1987, including 354 to Cedar Junction, 188 to Concord and 205 to Framingham. This represents an increase of 21% over the number of commitments during the same period in 1986 (N=614). For Cedar Junction this represents an increase of 39% over 1986 (N = 255); for Concord this represents an increase of 18% over 1986 (N = 159); and for Framingham this represents an increase of 2% over 1986 (N = 200).

During March there were 67 offenders returned to the DOC as parole violators.

To date there were 192 parole violators returned to the DOC during 1987. This represents a decrease of 12% over the number of parole violators returned during the same period in 1986 (N = 219).

### Releases

During March, 160 offenders were paroled to the street, 80 were discharged, and 29 were released at expiration of sentence. To date there have been 400 offenders paroled to the street during 1987, 237 offenders discharged during 1987 and 64 offenders released at expiration of sentence during 1987. This represents an increase of 6% over the number of offenders paroled to the street during the same period in 1986 (N = 376), an increase of 31% over the number of offenders discharged in 1986 (N = 181), and a decrease of 14% over the number of offenders released at expiration of sentence during the same period in 1986 (N = 74).

There were 85 males released to the street from secure DOC facilities in March. Of those, 36 (42%) were parole violators, 26 (31%) were first releases that had been in a lower security facility during their term of incarceration, and 23 (27%) were first releases that had not been in a lower security institution during their incarceration.

### Escapes

During March, 4 offenders were declared on escape, and 7 offenders were returned to custody from escape status. The number of escapes decreased by 19 compared to March, 1986 (N = 23), and the number of returns from escape decreased by 14 compared to March, 1986 (N = 21)

### Lower Security Statistics

During March, 202 offenders were transferred from higher security facilities to lower security facilities. In addition, 71 were returned from lower security

facilities to secure institutions. A comparison with the March, 1986 figures shows that transfers from higher security to lower have decreased 17% (N = 244) and returns to higher security from lower have decreased 38% (N = 115).

### **Lifers**

At the end of March there were 779 lifers in the DOC including Bridgewater State Hospital. There were 323 for the offense of murder-1 (41%), 391 for murder-2 (50%), 21 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (3%) and 44 for sex offenses (6%).

### **Furlough Statistics**

During March, a total of 633 furloughs were granted to 432 offenders, for an average of 1.5 furloughs per offender furloughed. There was one offender declared on escape.

During the month, furloughs were granted to 0.3% of the maximum/medium population, 21.5% of the lower security population, and 49.7% of the contract pre-release population.

At the end of the month there were 21 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

### **Work/Education Release**

At the end of March, there were 566 offenders in work release programs working at 593 different jobs. These figures are higher than those for March, 1986 (470 offenders working at 449 jobs).

At the end of March, there were 49 offenders in education release programs - a figure that is higher than the corresponding figure for March, 1986 (N = 46).

## MONTHLY STATISTICAL REPORT HIGHLIGHTS

August 1987

This report presents basic statistical information on admissions to and releases from the Department of Correction as well as participation in some inmate programs (furloughs, state hospital and work release). The statistics in this report represent transactions that occurred from the last Sunday of the preceding month to the last Saturday of the present month. Therefore the August figures cover the period from July 26, 1987 to August 29, 1987.

### Population

During August, the DOC population increased by 33 offenders from 6166 to 6199 (excluding those in MCI-Bridgewater, county facilities, federal prisons and prisons in other states). During the past year the DOC population increased by 469 offenders from 5730 in August, 1986 to 6199 in August, 1987. This represents an increase of 8%.

### Admissions

During August there were 191 offenders committed to the DOC from courts including 70 to Cedar Junction, 42 to Concord and 79 to Framingham. To date there have been 1910 court commitments to the DOC during 1987, including 842 to Cedar Junction, 474 to Concord and 594 to Framingham. This represents an increase of 13% over the number of court commitments during the same period in 1986 (N = 1690). For Cedar Junction this represents an increase of 22% over 1986 (N = 690); for Concord this represents an increase of 9% over 1986 (N = 435); and for Framingham this represents an increase of 5% over 1986 (N = 565).

During August there were 105 offenders returned to the DOC as parole violators. To date there were 597 parole violators returned to the DOC during 1987. This represents

an increase of 9% over the number of parole violators returned during the same period in 1986 (N = 549).

### **Releases**

During August, 160 offenders were paroled to the street, 114 were discharged, and 22 were released at expiration of sentence. To date there have been 1089 offenders paroled to the street during 1987, 714 offenders discharged during 1987 and 191 offenders released at expiration of sentence during 1987. This represents a decrease of 5% over the number of offenders paroled to the street during the same period in 1986 (N = 1152), an increase of 22% over the number of offenders discharged in 1986 (N = 583), and a decrease of 15% over the number of offenders released at expiration of sentence during the same period in 1986 (N = 224).

There were 87 males released to the street from secure DOC facilities in August. Of those, 28 (32%) were parole violators, 27 (31%) were first releases that had been in a lower security facility during their term of incarceration, and 32 (37%) were first releases that had not been in a lower security institution during their incarceration.

### **Escapes**

During August, 34 offenders were declared on escape, and 31 offenders were returned to custody from escape status. The number of escapes increased by 7 compared to August, 1986 (N = 27), and the number of returns from escape increased by 3 compared to August, 1986 (N = 24).

### **Lower Security Statistics**

During August, 246 offenders were transferred from higher security facilities to lower security facilities. In addition, 103 were returned from lower security facilities to secure institutions. A comparison with the August, 1986 figures shows that transfers from

higher security to lower have increased 27% (N = 194) and returns to higher security from lower have increased 23% (N= 84).

### Lifers

At the end of August, there were 783 lifers in the DOC including Bridgewater State Hospital. There were 324 for the offense of murder-1 (41%), 393 for murder-2 (50%), 21 for accessory to murder, armed robbery, unarmed robbery, armed assault or armed burglary (3%) and 45 for sex offenses (6%).

### Furlough Statistics

During August, a total of 325 furloughs were granted to 225 offenders, for an average of 1.4 furloughs per offender furloughed. There were zero offenders declared on escape.

During the month, furloughs were granted to 0.5% of the maximum/medium population, 10.0% of the lower security population, and 23.2% of the contract pre-release population.

At the end of the month there were 18 offenders on furlough escape status. This figure represents all outstanding escapes since the inception of the furlough program in November, 1972.

### Work/Education Release

At the end of August, there were 499 offenders in work release programs working at 525 different jobs. These figures are higher than those for August, 1986 (488 offenders working at 510 jobs).

At the end of August, there were 25 offenders in education release programs - a figure that is higher than the corresponding figure for August, 1986 (N = 17).
